

The image features a Siemens SIMATIC S7-1500 PLC rack in the foreground, with a TIA Portal software interface overlaid. The interface shows a project titled 'Siemens - TIA_Portal_Advanced_Controller' and a status window indicating 'Recording completed'. The background is a blurred view of the PLC rack with colorful waveform graphs overlaid, suggesting data analysis or monitoring. The Siemens logo and tagline are in the top right corner.

SIEMENS
Ingenuity for life

Advanced Controller SIMATIC S7-1500

Increased productivity with the ultimate power

Unrestricted © Siemens 2019

siemens.com/s7-1500

Demands of the automation market are user-friendly products, high performance and a scalable product portfolio

SIEMENS
Ingenuity for life

Globalization

- Global service network for automation suppliers
- Worldwide availability of products

Easy handling

- Easy installation, wiring and fast, efficient commissioning
- Efficient engineering

Protection of humans and machines

- Integrated safety and security functions

Digitalization

- Extensive simulation and standardization opportunities
- Cloud connectivity
- Optimization and transparency through data analyses

Plant availability

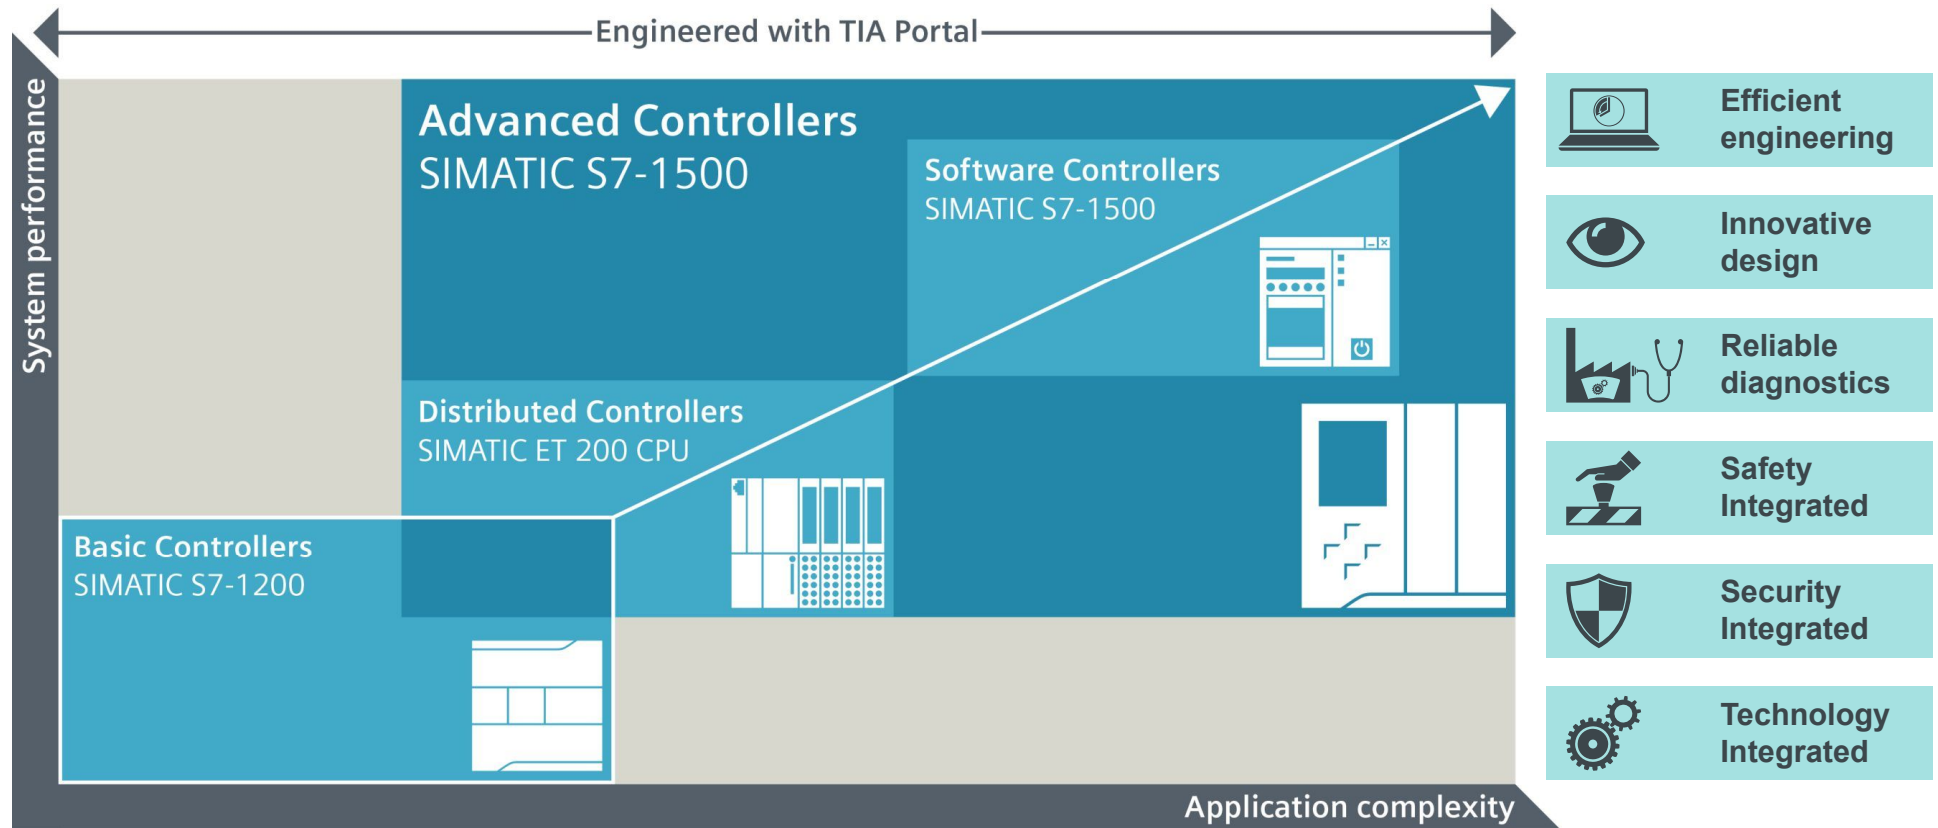

- Fast error localization and elimination to reduce downtime
- High spare part compatibility and availability

Increased production output

- High communication performance, fastest system response and efficient data processing

The SIMATIC Controllers portfolio offers always the right controller – plus integrated added value!

SIEMENS
Ingenuity for life

Advanced Controller – SIMATIC S7-1500 CPU

Increased productivity through ultimate power

SIEMENS
Ingenuity for life

Security Integrated

- Integrated copy and know-how protection function secures intellectual property
- Improved protection against manipulation and cyber threats (authentication)

Safety Integrated

- One controller for standard and fail-safe tasks, one network for standard and failsafe communication
- High-density channels of a failsafe IO module can be directly addressed from the engineering

High Performance

- Higher productivity and product quality thanks to the backplane bus and shortest reaction times
- PROFINET with deterministic time response ensure reproducibility and precision within μ s

Efficient Engineering

- Support of all IEC 61131-3 programming languages(LAD/FBD, STL, SCL and Graph)
- Integration of high-level language (C/C++) for Multifunctional Platform CPU 1518(F)-4 PN/DP MFP through SIMATIC ODK 1500S

Technology Integrated

- Simple to complex Motion Control task can be programmed directly in the controller (e.g. speed-controlled axes, camming, ...)
- A variety of technology functions can be implemented with I/O modules (e.g. PWM)

Reliable Diagnostics

- The automatic generation of system and user diagnostics enables quick error detection
- Any errors can be quickly localized on-site thanks to 1:1 LED channel assignment

Innovative Design

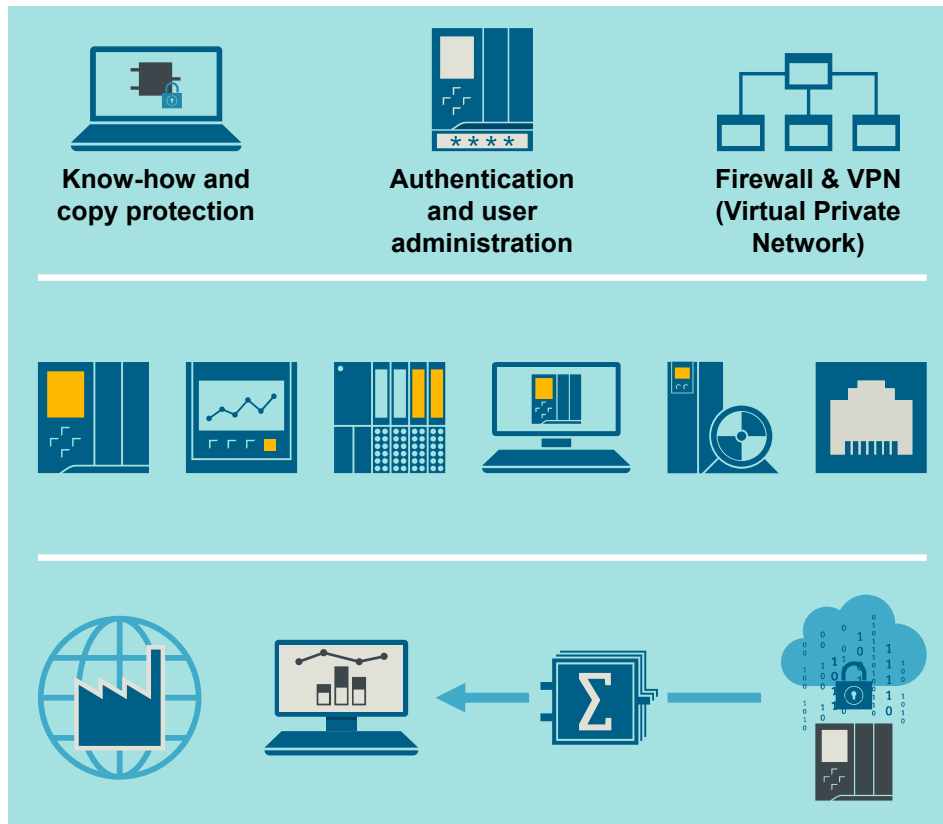

- CPU display supports diagnostics, initial commissioning and service (tag status, IP address assignment, backup, ...)
- Convenient wiring thanks to pre-wiring position of the I/O modules and jumper links

Advanced Controller – SIMATIC S7-1500 CPU

Innovative system functions for more productivity!

SIEMENS
Ingenuity for life

Protection of the intellectual property and investment spent

... thanks to security integrated function, like access, know-how and manipulations protection

Completely integrated safety features

... a single engineering environment for the standard and the safety-related automation

Predictive maintenance and digital services through data analysis with Mindsphere (Siemens Cloud for Industry)

... continuous monitoring of the machine performance and precise planning of the service assignment

Advanced Controller – SIMATIC S7-1500 CPU

Increased productivity through ultimate power

SIEMENS
Ingenuity for life

SIMATIC S7-1500

Feature / Function

Efficient Engineering

- Support of various programming languages (LAD/FBD, STL, SCL and Graph and C/C++¹⁾)

Simplified Maintenance

- Thanks to standardized machine and plant diagnosis ProDiag
- Integrated system diagnosis possible throughout all system components

Integrated Trace Feature

- Trace Editor integrated in the engineering
- Trace View also part of the web server

Highest user-friendliness

- Common front connector
- Pre-wiring position

High connectivity

- OPC UA data access on the CPU

Benefit

- ▶ Efficient commissioning and service through innovative download behavior
- ▶ Flexible and free program design

- ▶ Efficient diagnostics of process disruptions
- ▶ Fast spotting of automation system failures

- ▶ Program and application diagnostics in real time to spot even sporadic failures
- ▶ Error debugging without engineering

- ▶ Simple handling of wiring and easy commissioning directly at the device

- ▶ Vertical connection also to 3rd party devices and up to the ERP level

¹⁾ C/C++ as library function or independent applications with the Multifunctional Platform CPU 1518(F)-4 PN/DP MFP

Advanced Controller – SIMATIC S7-1500 Compact CPU

The Advanced Controller in compact design and footprint

SIEMENS
Ingenuity for life

SIMATIC S7-1500C: CPU 1511C-1 PN and CPU 1512C-1 PN

Feature / Function

Two compact CPUs with integrated analogue and digital inputs and outputs

- CPU 1511C-1PN
- CPU 1512C-1PN

- **Integrated counting measurement or frequency measurement with 100 kHz fast inputs**
- **Integrated 100 kHz fast outputs, usable for:**
 - PTO – stepping motor control
 - PWM – pulse width modulation
 - Frequency output

Less width with combined integrated inputs and outputs as 25 mm wide Push-In contacts

Benefit

- Well-priced entry level model of the S7-1500 system with periphery on board and a high number of integrated technological functions
- Reduced variety of parts and types

- Technological functionality integrated with on-board periphery
- Integrated technological functions for an easy and direct device connection, e.g. step drives, valves, ...

- Especially space-saving construction form by retaining the system characteristics of the S7-1500

Advanced Controller – SIMATIC S7-1500 Technology-CPU

Scalable motion control in the advanced controller portfolio

SIMATIC S7-1500T:
CPU 1511T/TF,
CPU 1515 T/TF,
CPU 1516 T/TF,
CPU 1517T/TF,
TO Kinematics

Feature / Function	Benefits
<p>Extended Motion Control functions:</p> <ul style="list-style-type: none"> • Speed-, positioning axis • Gearing • Camming • Kinematics with up to 4 interpolating axis 	<p>Simple programming of sophisticated Motion Control functions:</p> <ul style="list-style-type: none"> • in the well known SIMATIC environment • for a high machine flexibility • E.g. Pick & Place, assembly or handling tasks based on PLCopen
<p>Kinematic configurator and trace with path recording and kinematic control panel</p>	<p>Simple 3D visualization and diagnosis of movements as well as commissioning of the kinematics</p>
<p>Cam editor integrated in the TIA Portal</p> <ul style="list-style-type: none"> • Simple definition of non-linear dependencies between leading and following axes 	<p>High engineering efficiency through</p> <ul style="list-style-type: none"> • graphic-based and tabular configuration • optimization of cams
<p>Consistent functionality and programming of S7-1500 throughout to S7-1500 T-CPU</p>	<p>Seamless extension of the Motion Control functionality of a standard CPU in TIA Portal</p>
<p>Failsafe PLC with extended Motion Control functions</p>	<p>Standard automation, Motion Control and safety functions inside one CPU</p>

Advanced Controller – SIMATIC Multifunctional Platform The S7-1500 Controller with flexible C/C++ Integration

SIEMENS
Ingenuity for life

Multifunktionale Plattform: CPU 1518(F)-4 PN/DP MFP

Feature / Function

- Integration of high level language application and PLC program **into one hardware**
- **PLC independant applications in C/C++** for any application (e.g. protocol converter, database, ...)
- Code generation with **model based development tool**, e.g. Matlab Simulink
- Regular firmware updates stand for **highest security standards**
- **Closed embedded operating systems**

Benefit

- **Reduced space**
- **Robustness** of a SIMATIC S7
- **Simplified creation and reuse** of customer specific application in high level language
- Direct integration of **complex functions**
- Users solely care about the **implementation of the automation task**
- **Stability and long term availability**

Product overview – SIMATIC S7-1500

Dieffenbacher, wood industry

Particle board production with TIA Portal and S7-1500

Project information

Realizing a new plant for a new particle board production for the company Pfleiderer.

OEM wood industry

Eppingen/Germany

Products used

Previous system	Now
S7-400	S7-1500
ET 200S	ET 200SP
WinCC V7	WinCC Professional
Third party product	SINAMICS S120
Third party product	SITOP PSU100S
PROFIBUS	PROFINET
Trace: SPS Analyzer	Integrated trace function

Customer benefits

Reduced time of realization

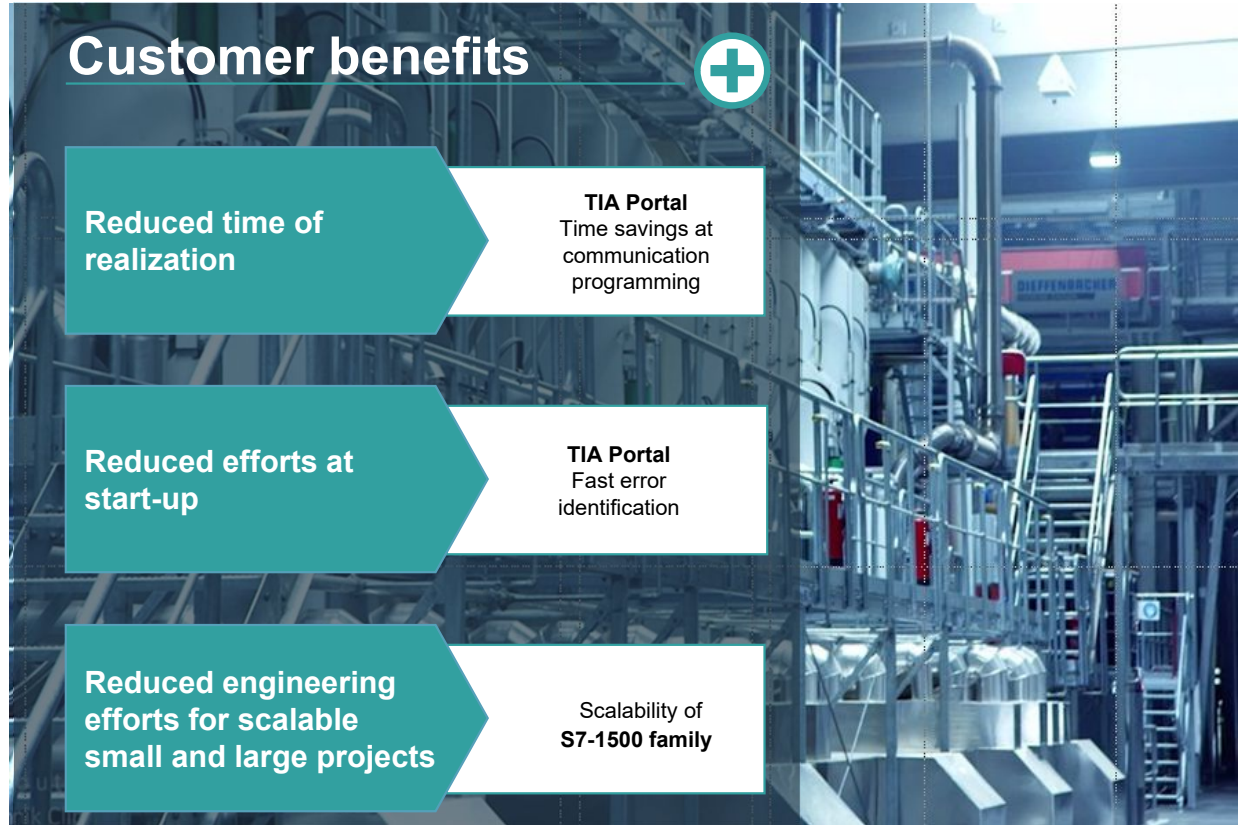

TIA Portal
Time savings at communication programming

Reduced efforts at start-up

TIA Portal
Fast error identification

Reduced engineering efforts for scalable small and large projects

Scalability of **S7-1500 family**

Advanced Controller SIMATIC S7-1500 CPU ... learn more!

SIEMENS
Ingenuity for life
